Biden's Failure to Acknowledge Natural Immunity Is 'Tearing This Country Apart'

In Thursday's segment of the "The Donlon Report," anchor Joe Donlon interviewed immunologist and public health advocate Dr. Hooman Noorchashm, who said President Biden's COVID vaccine mandate policies ignore about 100 million Americans who are already immune.

In Thursday's segment of the "The Donlon Report," anchor Joe Donlon interviewed immunologist and public health advocate Dr. Hooman Noorchashm, who explained there are no data proving vaccine immunity is superior to natural immunity.

Noorchashm said:

> "The problem is that we need to be focused on immunity. Instead, the Biden administration is focused on a one-size-fits-all vaccination and ignores about a hundred million Americans who are already immune and all the data is showing that these folks are equally, if not better protected from reinfection. It's really tearing this country apart.
>
> "I think there's a large number of folks who are vaccine hesitant or are on the fence about the vaccine who are COVID recovered … if I just had a whopping case of COVID, why should I go get this vaccine that has a certain incidence of complications?"

Hooman Noorchashm MD, PhD
@noorchashm

As expected, @POTUS did not say a word in his IL speech today, about millions of COVID-recovered and already immune Americans who are being coerced into unwanted vaxx, while most are equally if not better protected compared to the "fully vaccinated" with no prior infection.

This isn't the first time Noorchashm has advocated for public health officials to recognize natural immunity. Besides being very active on Twitter, he has written to the U.S. Food and Drug Administration and published blog posts on the risks of vaccinating people who have already recovered from COVID.

Absolutely a mistake to ignore natural immunity! My significant other and I have had the Igg antibodies since March 2020. We were just re-tested and still have robust antibodies over a year and a half later. We do not want to get the vaccine and take a chance with side effects and we don't want to be coerced or forced into getting the vaccine or unable to go to certain venues without a vaccine passport. This is just absurd. Even Italy allows those that prove they've recovered from Covid to get their "green pass" which allows them to go to museums restaurants etc. Why does Italy acknowledge that and not the United States? I believe it's because the pharmaceutical companies have a stranglehold over Washington!

CATRYNA49 Elizabeth Cosgrove • 8 hours ago

"Why does Italy acknowledge that and not the United States?"

It's because the UK and the US have always been the center of eugenics.

Rose ↗ Elizabeth Cosgrove • 4 hours ago

How do we determine natural immunity? The tests don't work, so who is immune. There is some serious cognitive dissonance going on in the independent media community. On one hand, people know the tests don't work, many know the virus hasn't been shown to have verified as a novel new corona virus, yet people still say we need cures based on a disease which has no specific test for diagnosis. What are you treating? What are you immune from? You do realize this is the argument to keep you arguing for unnecessary tests (to keep proving your immunity) and calling for big pharmaceutical cures. Oh, and the tests do NOT work so every bit of Covid-19 research which utilizes them to measure end points and diagnosis are invalid. Logic is going out the window as people get lost in the minutiae. The tests don't work: https://www.unite4truth.com...

Deborah Thomas Hladecek ↗ Elizabeth Cosgrove • an hour ago

I'm not sure about Italy, but in Switzerland they only recognize 180 days post infection. After that we're just considered un-vaxxed! It's absurd. Our family of 4 all had Covid too - Nov 2020. In April I still had antibodies and again in September I had higher levels! My functional MD said I was probably re-exposed on our summer Florida trip to Disney and 3 other cities! Natural immunity needs to be acknowledged!

Donna Gesualdi ↗ Elizabeth Cosgrove • 8 hours ago

could you share with me what test you got, how or where (doctor, local lab or online)? I would like to see where my antibodies are as well. thanks

There are many things he doesn't recognize. When are people - including news media - just going to admit. They don't want immunity, or hydroxy, or Ivermectin or regeneron - they want to DE-POPULATE - THEIR GOAL IS THAT PEOPLE DIE! THEY WANT PEOPLE DEAD. Stop playing these

stupid games, because that only feeds Fauci to keep going. He's the main one who needs to be executed for crimes against humanity. Start telling the truth.

4 ^ | v • Reply • Share ›

Kim from Brooklyn ↗ TruthHunter • 8 hours ago

You are correct. Just say NO and GO. Silence will be Fauci's biggest downfall. Gates Too. If we stop fighting (in the media eyes) and ignore these, it will drive them crazy. Maybe they will commit hari cari.

At 72 years of age, I have been exposed on two separate occasions, that I know of, since December of 2019 to 5 of my family members within my own household. And so has my husband of 74 years. We never even contracted a sniffle. In fact, he and I haven't had any illness for the past 9 years. Neither of us has ever had a flu shot, and none of our children or grandchildren ever have either and that also includes my parents and grandparents. We obviously have natural immunity which is probably true of most of our generation, but unfortunately most of our peers were all to willing to run out and get shot up before giving themselves time to wait and see. To be totally honest, I am ashamed of my generation for being a bunch of lemmings and jumping off a cliff just because some moron told them to.

Biden went all the way to Chicago to what? Coerce more companies to mandate Covid experimental biologicals for their employees and to coerce all the people in Chicago to get this treatment. And ignore a city that has been ruined by gangs killing each other and now killing others. Companies abandoning Chicago like the plaque.

The city of Chicago lay in ruins after black lives matters helped to destroy it. MIchigan avenue and Downtown like a ghost town. Gangs have taken over. Shooting the windows out along Lake Shore Drive apartment buildings, robbing shops, in the middle of the day. Shooting people driving on the Eisenhower expressway randomly. Doesn't that sound like a place you would want to live. And instead of addressing this complete breakdown in society, JOE BIDEN CHOSE TO COME TO CHICAGO TO COERCE PEOPLE TO TAKE AN EXPERIMENTAL BIOLOGICAL. One that has minimal safety and efficacy data and NO long term safety or efficacy data. If that doesn't tell you this is not about a virus, I am not sure what will.

See Steve Kirsch's newly published paper suggests the deaths post vaxx in USA, 200,000.

Asking this government to accept natural immunity will simply not happen. Asking this government to recognise the damage done by these vaccines will simply not happen. Two top FDA scientists have just resigned along with a CDC top scientist. Guess they could not stomach the government' s decision to override their expert advice. Or were they concerned they may go to jail when the truth is exposed?

I own retail stores in Naples Florida and am seeing more and more people moving from Chicago. When I ask them what brought them here, they comment what this above poster said, that the blm thugs and criminals have shitted up the place so badly that they have lost confidence in it ever being fixed due to it's too much of a hot-potato issue with those in power too afraid to stand up to the crud crowd and cringe and retreat rather than be labeled a "racist" .

Nice.

I am also seeing many more people from California (especially the Beverly Hills area where swat teams with tanks and machine guns had to be called to RODEO DRIVE at the beginning of the blm takeover.). Now on Rodeo Drive the only "shoppers" are blms with stolen credit cards and wire cutters used to cut off the security leashes on expensive pocketbooks. I'm told the store staff don't even attempt to stop them.

Nice.

Also Atlanta, specifically Buckhead, a once beautiful, safe, quiet, high-end community, now overrun with blm's criminals and rapists.). I ask them; same answer.

Leslie Taylor • 18 hours ago • edited

I've seen recent videos of Biden and he's not cognitively functioning well at all. It appears to be a rapid decline. I'm hardly a specialist on dementia but I would be surprised if that rapid of a decline is typical of dementia. We're really in a bind here because no one in their right mind could want VP Harris to take over. Then there's Pelosi, third in line. All three seem but intent on widespread

destruction. Of course, who really is leading this country down this destructive path? One can easily assume the NWO elites are running this horror show. We obsess over the details of the virus and now variants, and who knows what's next, all of which are but an excuse for the injections along with TV, mainstream news and social media, 5G and cell phones, etc., to track, control and manipulate populations worldwide. Are there no organizations within our nation, and others, led by intelligent, empathetic human beings that can halt this mass annihilation? The young people I've spoken with are so frightened. It's heartbreaking.

kris • 20 hours ago • edited

my main thing is i know the "vaccine passports" are so dangerous. invasion of privacy, tied to social credit score etc... just like communist china. so basically i dont want to be forced to carry one around for natural immunity either! and then all they would have to do is claim some new boogie man variant evaded natural immunity and force people back on their gravy train.

but yes i am proud of my natural immunity and am rejecting the big pharma junk lol.

total scam!

3 | • Reply • Share ›

Michael Raymond • 19 hours ago

But doctor, natural immunity doesn't ramp up fear.

2 | • Reply • Share ›

Liona Shareing • 20 hours ago

I wish President Biden would watch this with an open mind and realize what he's doing is wrong in forcing people to chose between possible death and injury or being able to work and live in America!

2 | • Reply • Share ›

CATRYNA49 ↗ Liona Shareing • 8 hours ago

2 | • Reply • Share ›

Kim from Brooklyn • 8 hours ago

Chicago. Poor state. No wonder he is going there. Hit them when they are down. Heck. He may even offer then $1000 and one month's free rent if they take the jab.

What does he get? Kickback from BigPharma. For every $1000 he gives out, Big Pharma gets 10 times that amount.

Chicagoians!! Don't fall for his BS.

Will Falconer, DVM • 9 hours ago • edited

Did I hear him state the "vaccine" efficacy is between 10-30%? I'm confident, having recovered from COVID-19 in March 2020 that I have strong immunity and zero reason to be pressured to get a rushed to market "vaccine." He clearly made the point that vaccination ≠ immunization. That fact is being grossly ignored by all those pushing mandatory vaccination.

1 • Reply • Share ›

Hooman Noorchashm ↗ Will Falconer, DVM • 3 hours ago

I mis-spoke. I meant "vaccine inefficacy" of 10-30% depending on the brand - NOT "vaccine efficacy". Earlier in the interview I stated it correctly.

• Reply • Share ›

Jason Millman • 17 hours ago

Dr Hooman's intentions are well, but he is still asking (pushing) people to take an experimental never-before-used-on-humans-in-mass-scale injection that has no liability, no long term studies, no FDA approval, no nothing. To me, that's unethical. Let's remember that this condition, cluster of symptoms called "COVID 19" has a 99% recovery for most age groups. What's going on? It is not ethical to push anything onto anyone for any reason - even if the recovery rate was much lower! No means no. "First Do No Harm" means don't harm. Simple as that.

1 • Reply • Share ›

Hooman Noorchashm ↗ Jason Millman • 3 hours ago

Yes. I do believe that in the UNIMMUNE and UNINFECTED, the benefit of the vaccine FAR outweighs its risks during this pandemic....The problem is NOT the vax, it's the designer virus with a GoF from China.

^ | v • Reply • Share ›

Jenna • 5 hours ago

Biden isn't ignoring natural immunity. Natural immunity doesn't exist until pharma and the media says it exists and it no longer interferes with profits.

CHD should get the thought out of it's head that they are dealing with some kind of elected government that wants to do the right thing. Biden is not a president. He is a corporate operative. I see now that I'll be not only out of work as of October12th but I will also be paying an extra 43% for natural gas this winter!

So even though I am unemployed and freezing to death I'm really glad that 25,500,900 million billion trillion years from now it might be a half degree cooler.

I wonder if me and my kids will be able to fry our stolen chicken eggs on all these useless solar panels that are taking up acres and acres of land around here. Maybe we can build makeshift houses out of used solar panels. Pinterest here I come!

Remember that democrat Obama who was president not so long ago? That's when gas was fu@ing four dollars a gallon. No one could afford to drive to work!

Hey democrats:

Fu@k your vaccines! Fu@k your climate change! and

Fu#k you!

God put this world here for us humans to use as we see fit. We are the most important creatures on this planet and in this universe! Stop treating us like some kind of vermin that must be

controlled or eliminated!

It is Pharma Pimps' shell game, bait and switch, proxy token end point reductionist scam. Immunity and antibodies are not the same thing.
Antibodies specific to the pathogen come after exposure and infection. But asymptomatic and mild cases, a majority of those exposed, recover without having Rona-specific antibodies initially. Antibodies might prove they had the disease but it was other immune system innate and general factors that cured and protected them. Even if months later recovered patients did have lower antibody titers than at peak levels their pre-infection immunity or protection is likely still high.
